EDUCATION

UNIVERSITY OF DELAWARE *GPA: 3.95*

Newark, DE

Bachelor of Science, Computer Science, Concentration: Software Engineering

Graduated May 2026

Minor in Cognitive Science

Awards: Magna Cum Laude, CIS Outstanding Junior Student, New Jersey Governor's Award (*Arts Advocacy*)

EXPERIENCE

APPLE

Cupertino, CA

Camera & Photos Tools Experience Intern (*Full-stack*)

May 2025 – Aug. 2025

- Built **AI Insights** feature providing qualitative test performance analysis for a **700+** user platform
- Led the full development lifecycle, defining user requirements, designing system architecture, and implementing frontend and backend components for a **JavaScript/React** UI with API integration
- Automated qualitative test analysis through **LLM integration** and **prompt engineering**, reducing hours of manual work to seconds by identifying key concerns, improvements and regressions, iterating based on beta release feedback

M&T BANK

Wilmington, DE

Technology Intern

June 2024 – Aug. 2024

- Migrated **2** full-stack applications across **5** environments from Azure DevOps to GitLab employing CI/CD pipelines and smoketesting internal and external sites
- Resolved **400+** **Veracode** vulnerability flaws identified by the integration of automated scan and test jobs
- Represented M&T Bank's Intern Class of 2024 as the facilitator of a discussion with Delaware Governor John Carney for an audience of **30+** interns across **15** companies

DELAWARE ATMOSPHERIC PLASMA PROBE EXPERIMENT

Newark, DE

CubeSat Satellite Ground Software Developer (*NASA's CubeSat Launch Initiative*)

June 2024 – May 2025

- Prototyped an early PyQt ground-station GUI, collaborating with the electrical team to translate telemetry requirements into accessible subsystem displays
- Collaborated across software and electrical teams to define communication flows and telemetry packet structures, testing data exchange with the flight computer through hardware measurements and telemetry code

HENHACKS HACKATHON

Newark, DE

Senior Advisor ('25-'26), Head Coordinator ('24-'25), Registration Committee Head ('22-'24)

Sept. 2022 – Feb. 2026

- Served as Head Coordinator of HenHacks 2025, an event with **500+** attendees across **53** universities achieving **98%** attendee satisfaction, acting as primary point-of-contact for **50+** prospective sponsors
- Directed a cross-functional team of **22** undergraduates, overseeing **4** committees, managing stakeholder coordination, sponsorship outreach, and event logistics to ensure timely delivery and quality execution

PROJECTS

SoundMate (*TypeScript, React, Cloudflare Workers, NestJS, Prisma, Supabase, Auth0, Spotify Developer API, Render*)

A full-stack social music matching platform that calculates listener compatibility using Spotify profile data, supporting friend connections and event creation/joining to assist users in finding concert and music friends. Developed on a team.

AI Career Quiz Helper (*TypeScript, React, OpenAI API*)

An interactive, user-friendly career suggestion platform that generates AI-driven reports on industries, average salaries, and job positions. Developed collaboratively within an Agile team, ensuring efficient project management.

Call Companion (*Dart, Flutter*)

An assistive technology Android application that employs iconography to help users efficiently track essential information during phone calls, including event name, time, date, and location. Features integration with Google and Apple Calendar, enhancing usability and organization.

SKILLS

Languages/Tools: Python, Java, C, C++, TypeScript, JavaScript, HTML/CSS, R, Dart, PowerShell, Git, GitHub

Technologies: React, Node.js, NestJS, REST APIs, Supabase, Render, Agile, Debugging, LLMs, Agentic AI

Related Coursework: Data Structures, Algorithms, Software Engineering, Parallel Computing, Operating Systems, Database Systems, DevOps, Advanced Web Technologies, Intro to Computer Science I (**Teaching Assistant**)
